-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 19-24, 26 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi et al 5602723.

Takahashi et al discloses a connection module for a distribution device, having a housing, an SDH/Sonet transport interface and an output for an electrical signal, with a converter for conversion of SDH/Sonet transport signals to electrical signals, being arranged between the input and the output within the housing.

Claim 28 is rejected under 35 U.S.C. 102(a) as being anticipated by DE 10236361.

Paragraphs 24-28 of DE '361 disclose a distribution board connection module for a distribution device for communications and data technology, comprising a housing in which externally accessible input and output contacts are arranged for connection of lines, cables or conductors, with the input contacts being in the form of plug connectors and the output contacts being insulation-displacement terminal contacts or coaxial plug connectors, with functional elements being arranged electrically between the input and output contacts in the housing, the functional elements being in the form of line drivers for an STM1 board.

Claims 25 and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-18 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record, particularly the applied art, discloses or teaches the further connection module with the SDH/SONET transport interface; nor the further connection module having at least two plug connectors for at least two distribution board connection modules; nor an external voltage supply for the line drivers being connected via at least one pin of the plug connector; in combination with the rest of the subject matter of the respective independent claim.

The other reference cited on Form 892 discloses a similar distribution device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to GARY PAUMEN whose telephone number is 571-594-3830 OR EMAIL: gary.paumen@uspto.gov. The examiner can normally be reached on Monday-Thursday.
